PATENT

98. (new) The method of claims 68, 70, 72, 74 or 84 wherein the stoichiometry of the delivered first or second components is varied between respective regions.

 99. (new) The method of claims 68, 70, 72, 74 or 84 wherein the thickness of the delivered first or second components is varied between respective regions.

REMARKS

In this Supplemental Amendment G, claims 96-99 have been added to define preferred embodiments of Applicants' invention. No new matter has been added. Hence, claims 8, 10, 11, 15-24, 26, 30-35, 42, 43, 45-49, 51-56, 58-60, 64-72, 74-99 are now pending in the above-referenced patent application. Of these, claims 58, 59 and 79 are drawn to non-elected species, and have not been considered on the merits.

Applicants respectfully request further consideration of these claims, in view of the above amendments and the following remarks, together with those amendments and remarks set forth in the previously-filed Amendment F.

Correction

In the previously-submitted Amendment F, Applicants incorrectly identified the U.S. Department of Energy as the sponsor of collaborative research for materials such as thermoelectric materials and magnetic materials. In fact, such research was done at Symyx for the Defense Advanced Research Projects Agency (DARPA) – not for the Department of Energy.

Declaration Evidence

Applicants expect to file a further supplemental amendment to submit declaration evidence in support of Applicants' position as set forth in the earlier-filed Amendment F.
